DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-9, 11-15, 17, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Inukai.

Inukai shows a rotary atomizing coating apparatus comprising an atomizer head 1 having an atomizer head inner part 5 and center cone portion that is provided at a back of the atomizer head inner part 5 and that has a tip angle that is in a range of between 30 and 90 degrees and also in a range between 60 and 80 degrees as recited in claim

2. The apparatus further comprises a coating spray nozzle 13, wherein the center cone portion has an inclined surface portion that includes a straight line-formed portion, and the straight line-formed portion extends from the tip portion of the center cone portion to a point where a virtual line extending from an outermost side portion of the coating spray nozzle passes through the inclined surface portion (see Figure 1 attached herein) as recited in claim 3. Inukai also shows a plurality of coating spray nozzles as recited in claim 5.

Allowable Subject Matter

Art Unit: 3752

3. Claims 4, 10, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Vetter et al., Weinstein, Kwok, and Kwok et al. are pertinent to Applicant's invention.
